To: Kevin Walters/ Opta Minerals

I am writing this letter to let you and every one in your company know the results of our company switching from Coal Slag to Ebony grit.

First of all; the reduction in dust was at least 70% absolutely amazing. I can actually see my blaster at work! , Second. The productivity increase has been in the area of 60% faster. I can honestly say within the first sack of the Ebony grit we saved enough in labor to offset the higher cost. Feel free to let any future contacts know of our appreciation of your product, and the knowledge, and expertise of the salesman.

Respectfully,

Kevin Wood  
Purchasing/Contracts Manager
